**Subject:** RE: Use of MLK Center roof to house a ambient air monitoring unit

This is fine with me as long as the Mayor is on board.

Subject: Use of MLK Center roof to house a ambient air monitoring unit

EPA is in the process of identifying locations in the Calumet area to house air monitoring units. We would like to set up a meeting to discuss the possibility of placing a unit on the roof of the MLK Center and explain the purpose of the sampling. You can reach me by email or through my cell 312-802-0682.
